

AKKUYU NGS AŞ

ROSATOM

Human Resources Development for BOO project. Akkuyu NPP Turkey

JSC “Akkuyu Nuclear Power Plant”

Deputy CEO for HR & Administration
Andrey GURLENOV

19 – 20 March 2014

Akkuyu NPP is the 1st Rosatom's BOO Construction Project

Akkuyu site, Turkey

Akkuyu Project Features

- First Nuclear Power Plant in Turkey
- First Rosatom's BOO (build-own-operate) project. Under the IGA, Akkuyu NPP JSC is responsible for engineering, construction, Operation and Maintenance (O&M) of the plant.
- Legal basis: Intergovernmental Agreement, May 12, 2010
- Project design: AES-2006 (VVER-1200)
- Total capacity: 4,800 MW. (4 x 1200 MW)
- Implementation period: 2011-2023
- Total cost ~ \$ 20 Bln
- Power Purchase Agreement for 15 years, fixed price terms
- Support by the Russian and Turkish Governments
- Maximization of Turkish personnel involvement in construction and operation of the plant.
- Job creation potential – up to 10 000 for the construction period
Up to 4 000 for O&M period

ROSATOM

Main challenges of BOO project

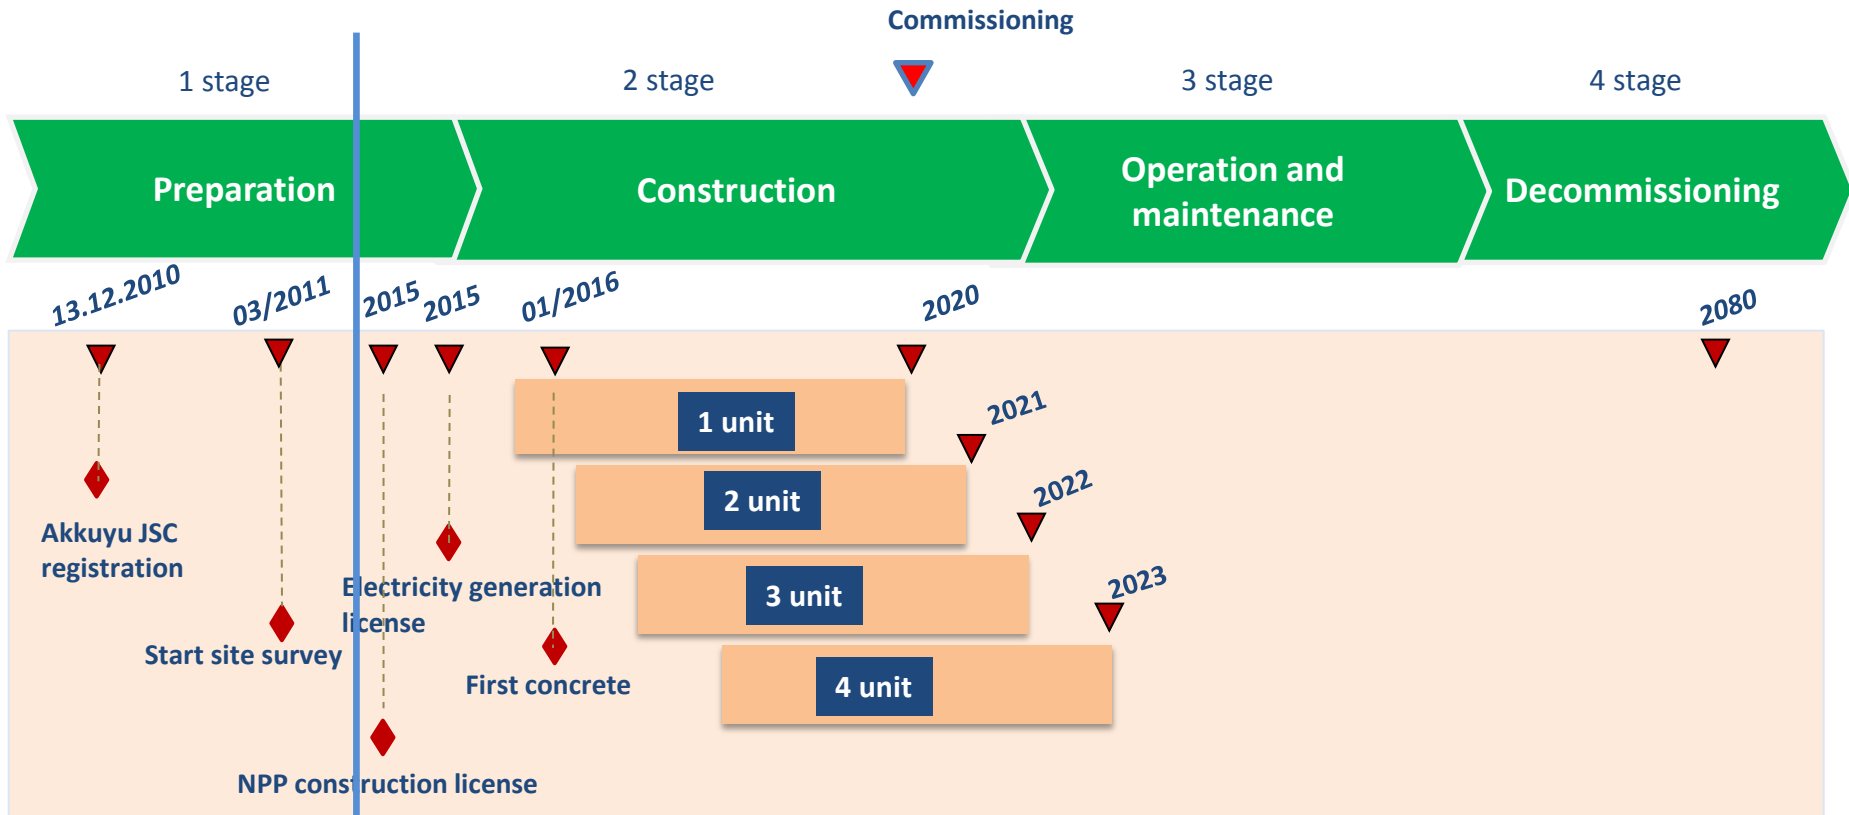

- Single responsibility of one entity for execution of all phases of the project (development, financing, licensing, construction, O&M)
- Formation of positive public acceptance is of paramount importance for developer and initially his sole responsibility
- Unavailable or limited HR infrastructure in the nuclear sector of the country
- Development of nuclear energy sector is very important from national government stand point but BOO project is driven by strictly business approach

ROSATOM

Akkuyu NPP Project

- Environmental report
- Project design of NPP
- Power Purchase Agreement

ROSATOM

Staff preparation (education)

- There are different options of staff sourcing for new NPP project:
 - To hire power engineers and train them in Nuclear Energy field (i.e. special training centers)
 - To provide full University degree education for future employees

We will use both options, but the main issue is working language - **RUSSIAN**

Another option is to provide Master's degree education for Turkish bachelors

Anticipated preparation program of Turkish operation staff

Main specialties used for staff preparation:

| # | Name of area of degree |
|---|-------------------------------------------------------------------------------|
| 1 | Nuclear Power Plants |
| 2 | Nuclear reactors and power plants |
| 3 | Radiation safety for people and environment |
| 4 | Thermal power plants |
| 5 | Water and fuel preparation technologies for NPP's |
| 6 | Technical operation & maintenance of electro and electro-mechanical equipment |
| 7 | Automated control systems |
| 8 | Electrical engineering, electrical mechanics, electrical technologies |
| 9 | Automated systems of information processing and control |

| Number of students | years | | | | | | |
|--------------------|-------|------|------|------|------|------|------|
| | 2011 | 2012 | 2013 | 2014 | 2015 | 2016 | 2017 |

| Fact | 48 | 112 | 190 | | | | |

ROSATOM

Future plans

- Elaboration of hiring plans for O&M phase
- Finalization of education programs and schedules (when, how many and what level of graduates do we need)

ROSATOM

Thank you for your attention
